

Enterprise Chat System

DEVELOPER DOCUMENT

Version: 1.0

Date: 15/05/2016

Team Name:

Invictus

Team Members:

1. Balusu, Geethanjali
2. Budda, Shiva Tarun
3. Byreddy, Sreenibha Reddy
4. Kalaparti, Adithya
5. Mamidi, Mounica
6. Mara, Nikhil
7. Mohammed, Zaahid Mukarram
8. Neelam, Sankeerthana
9. Sanagari, Vivek
10. Srinivas, Sri Krishna
11. Yerrapragada, Sita Rama Suryateja

1.Preface:

The product enterprise chat system is developed for the safe and secure communication between the users. The document describes about the source code organisation, APIs, database table format, data format when communicating with the system,

Release v1.0 on 15-05-2016

-initial release

The remainder of the document is organized as follows. In Section 2, Glossary and Abbreviations of terms used in the document is provided. Section 3, deals with introduction of the document. sections 4, describes the software description of the product. Section 5, deals with the system architecture section 6 deals with the structure of the database. In Section 7 , deals with extension the product.

2.GLOSSARY AND ABBREVIATIONS:

- **PHP:** Hypertext Preprocessor
PHP is open source general-purpose scripting language and an interpreter used for web development and which can be embedded into HTML.

3. INTRODUCTION:

This document gives brief overview about the technical aspects of the product. This document also serves the assistance for developers for adding new functionalities.

4.SOFTWARE DESCRIPTION OF THE PRODUCT:

The backend of the product is totally written in PHP script. The front end of the product is written in HTML and PHP which interacts with the database and shows the various contents like chat box, contact book, status of the users on web based GUI. Ajax is used in the backend module of the product for dynamically updating the contents of the database tables.

5 SYSTEM ARCHITECTURE:

5.1 PROGRAMMING LANGUAGES USED:

- Html
- PHP
- Java Script
- MySql
- Ajax
- JQuery
- MySQL Database

5.ORGANISATION OF SOURCE CODE

Front end:

- 1.index.php
- 2.signuppage.php
- 3.adminpg.php
- 4.afterlogin.php
5. image files(blue.png,orange.png,purple.jpg,green.png)
6. deleteaccount.php
7. getautocomplete.php
- 8.idle.php
- 9.index1.php

10. mysqlimage.php

11.style.css

12.style1.css

13. style2.css

14. style3.css

15. style4.css

Database:

1.get.php

2.verifyadmin.php

3.verifylogin.php

4.configure.php

5.connect.php

Backend:

1.nik

1.1.box.php

1.2.index.php

1.3.chat.wav

1.4 idle.php

1.5 get.php

1.6 magic.css

1.broadcastmail.php

2.chatdetails.php

3.individualstats.php

4.integratestats.php

5.chathistory.php

6.adminaflg.php

7.userstatistics.php

8. dbase1.php

9. dbase2.php

10. dbase3.php

11.f.php

12.newadmin.php

13.record.php

14.recordstatistics.php

3. library files:

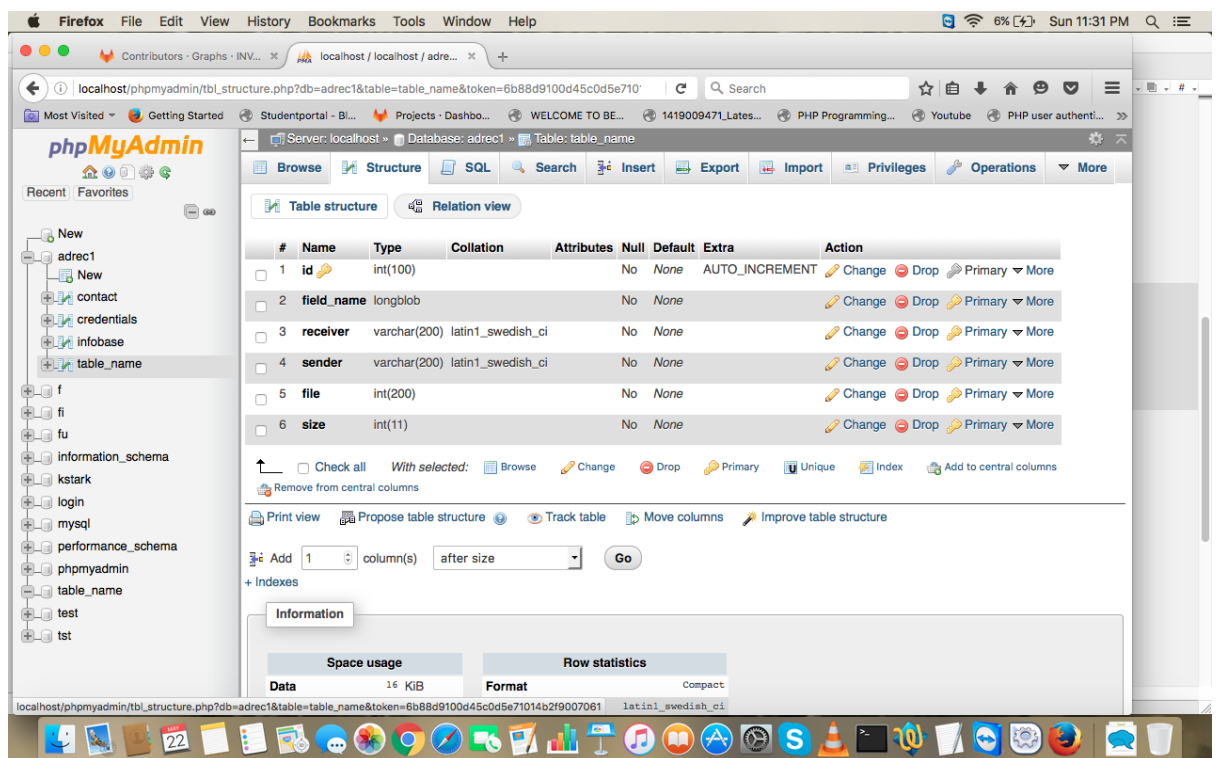

3.1 jquery.js

3.2 jquery-1.12.3.js

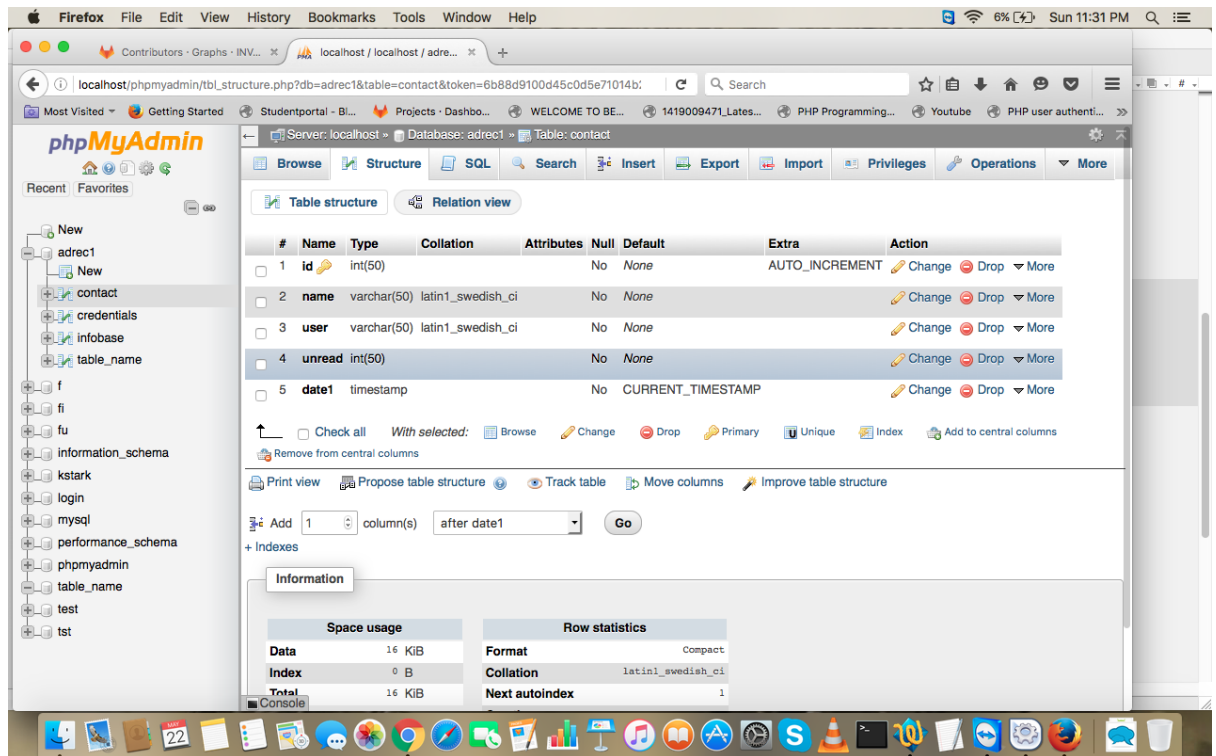

6.STRUCTURE OF THE DATABASE

The product uses single database with its name as adrec1 consists of three tables namely:

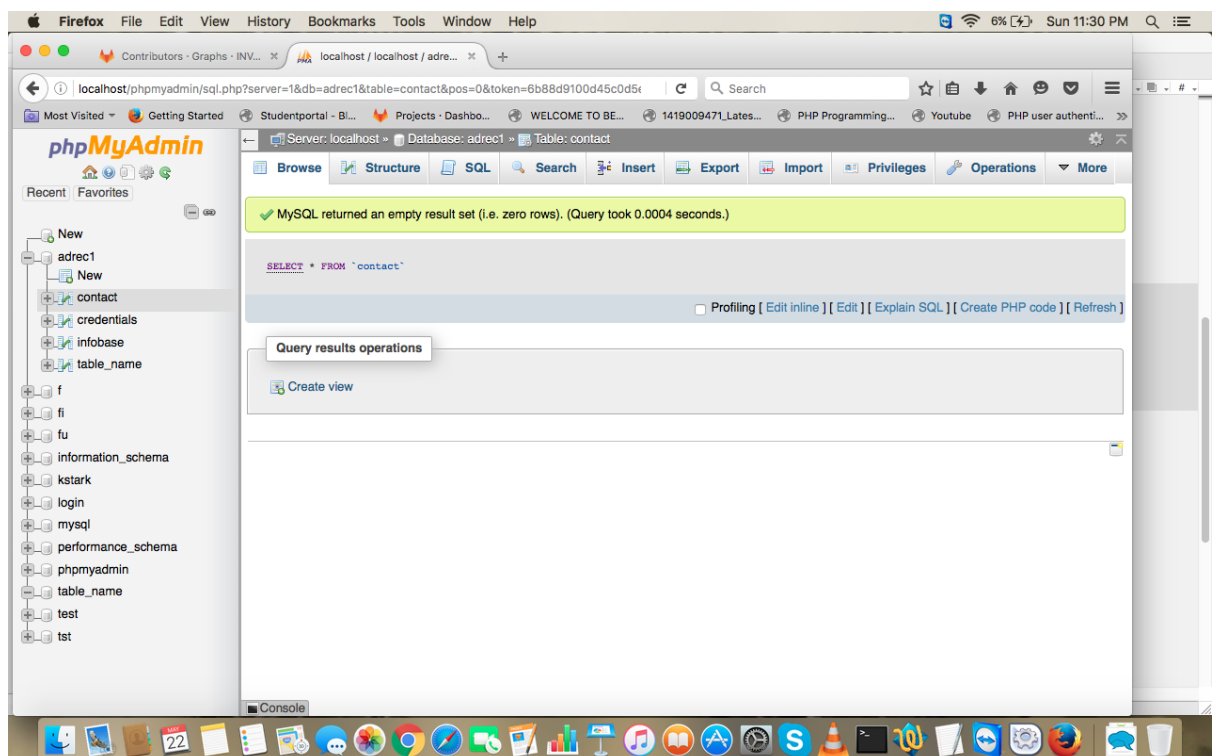

1.credentials table used for storing the details of the users

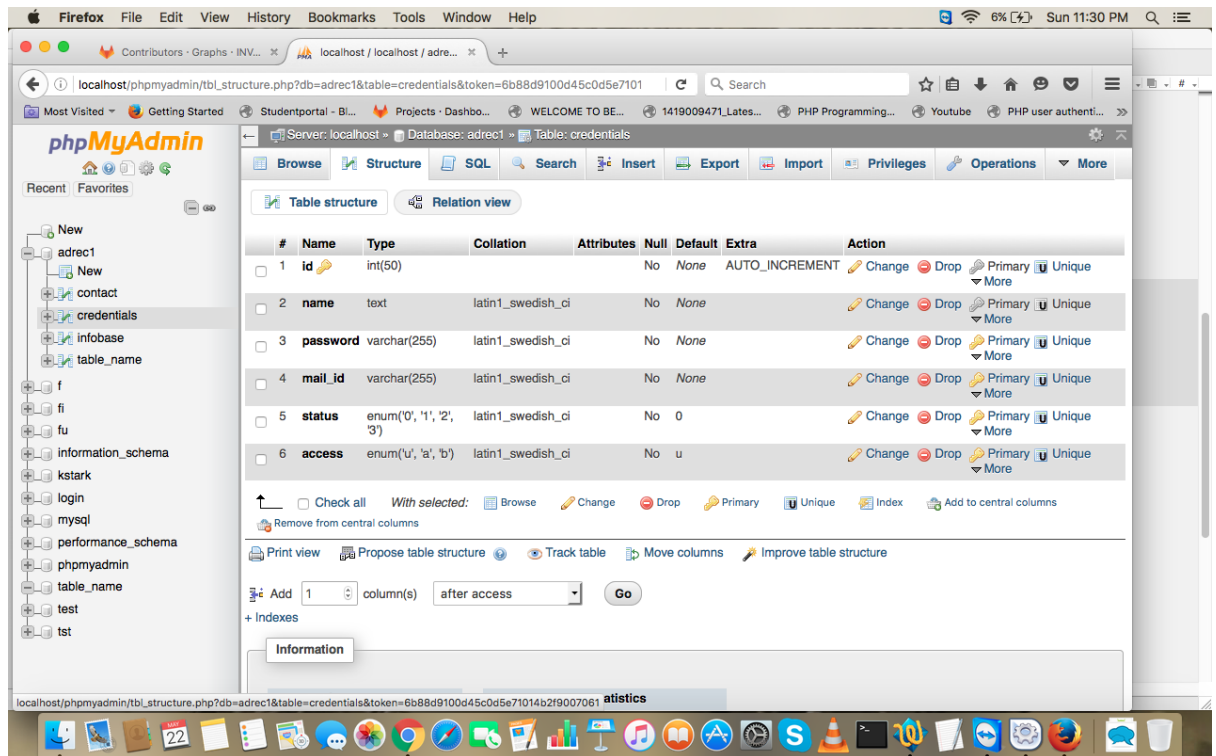

2.Infobase table used for storing the conversation between the users.

3. Contact table used for storing the contacts of the users.

4.

The functionality of the product can further improved by adding additional features to the chat function like the exchange of audio and video files, group chat, voice recording, video chat.
